EMS Session on Public Awareness

Organizers: Roberto Natalini

Wednesday, 16:30 – 18:30

H2032 (main building)

- 16:30 Public awareness is a crucial issue for modern mathematics. If mathematics is a fundamental discipline for our society, on the other hand the great majority of people is unaware of the ideas and the achievements of mathematics. This event, promoted by the Raising Public Awareness Committee of the European Mathematical Society, is intended to provide an overview of the activities of the committee and also to give some suggestions for possible activities to be developed in each country. The new improved site Mathematics in Europe will be presented, as well as the possibilities of future collaborations. Some reports about Math Fairs and Math Exhibitions will be also discussed.

Funding Agencies Panel

Wednesday, 16:30 – 18:30

Organizers: Carsten Balleier, Petra De Bont,
Frank Kiefer, Christiane Kloeditz

H1012 (main building)

16:30

This panel aims at addressing the role of funding agencies with respect to three relevant topics, which will be discussed by representatives of funding agencies and the mathematical community: the current status and role of international cooperation, interdisciplinary research in the mathematical sciences, and the support and advancement of early career researchers. We invite programme managers and members of decision-making bodies from different European funding agencies as well as active researchers to discuss these topics in three separate rounds. For each topic, panel members will give a short introductory talk addressing relevant questions, also concerning the role of funding agencies. These brief presentations will serve as a starting point for the discussion among the panel members, in which the audience will be welcome to participate and share their views.
